DETAILED ACTION

Allowable Subject Matter

Claims 8, 9, 12-14 and 17-31 are allowed.

The following is an examiner's statement of reasons for allowance: The amendments to the claims overcome the rejections under 35 USC 101 which had been made in the prior office action. The claims are now directed to a device comprising a plurality of computer terminals having software which provides a plurality of thought results to the terminals in a specific manner. The computers now serve a function beyond mere display of information, as had been previously the case. While the individual thought results are subjective, the invention now provides a useful, tangible and concrete result, in that a network of computers allows a plurality of users to receive and select thought units in a specific way, which results in a filtering process contributed to a plurality of users. One of ordinary skill would understand such terms as "solutions to solve the subject", "actions to be taken" and "keywords". The invention now clearly represents a practical application in the technological arts. Also, there is no disclosure or suggestion in the prior art of the device as claimed. While brainstorming devices and methods, including some performed over a computer network As a result, the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
